

TSHEGOFATSO NKOSI

(+27) 67 670 9389 | TR.Nkosi@outlook.com | [LinkedIn](#) | GitHub: <https://github.com/>

PROFESSIONAL SUMMARY

Adaptable and solutions-oriented IT professional with a solid foundation across modern technology domains, including software development, cloud computing, networking, and cybersecurity. Experienced in building and supporting scalable, secure applications while applying best practices in system design and problem-solving. Continuously driven to learn, improve, and stay current with evolving technologies, with a strong interest in cloud-native systems and DevOps methodologies. Eager to contribute to dynamic environments by delivering reliable solutions, collaborating effectively, and growing both technically and professionally.

EDUCATION & CERTIFICATIONS

Hoërskool Westonaria High School - Matric (Grade 12) - (2023)

ISC2 - Certified in Cybersecurity (ISC²) – (2024)

HyperionDev / University of Stellenbosch - Full Stack Web Development (NQF 5) - (2024)

Cisco Networking Academy – Networking Basics (2025)

Cisco Networking Academy – Junior Cybersecurity Analyst (2026)

Afrika Tikkun - Introduction to Data Analytics (2025)

Linux Foundation - Kubernetes and Cloud Native Associate (Expected – May 30)

TECHNICAL SKILLS

Programming & Development: JavaScript, TypeScript, Vite, React.js, Next.js, Node.js, Express, HTML5/CSS, Python, NoSQL

Cloud & DevOps: Kubernetes, Docker, CI/CD pipelines, API integration & microservices

Networking & Systems: TCP/IP, DNS, HTTP/HTTPS, Firewalls, Linux CLI

Data & Tools: Git, GitHub, Power BI, SQL, Docker, Postman, MongoDB, Shopify, Firebase, PostgreSQL

PROFESSIONAL EXPERIENCE

Education Assistant — ICT | [Isiqalo Full Service Primary School], | [June - 2025] – [November 2025]

- Assisted teachers with classroom management and maintaining student order during lessons
- Typed and formatted lesson preparation documents, examination papers, and administrative materials

PROJECTS

Superbalist-Inspired E-Commerce Store (React, Vite, TypeScript): [\[Live Demo\]](#), [\[GitHub Link\]](#)

- Solved inconsistent shopping cart and wish-list state by implementing persistent per-user state management using React Context API and localStorage.
- Built a responsive, mobile-first e-commerce UI with Tailwind CSS to improve usability across devices.
- Implemented dynamic client-side routing for efficient product browsing and navigation.

AI Music Detector (React, Vite, TypeScript): [\[Live Demo\]](#), [GitHub Link](#)

- Addressed the growing challenge of AI-generated music detection by simulating spectral, harmonic, temporal, and metadata analysis.
- Generated confidence scores and visual insights to improve result transparency and user understanding.
- Delivered a modern, interactive frontend for complex analytical outputs using React and TypeScript.

YouTube Downloader (Vite/React, Typescript and Tailwind CSS): [\[Live Demo\]](#), [GitHub Link](#)

- Engineered a high-performance media tool that converts YouTube URLs into downloadable MP3/MP4 files with scalable bitrates (128kbps – 320kbps).
- Networking & Performance: Utilized Node.js Streams to pipe video data directly to the client response, minimizing server memory usage and reducing latency.
- Implemented basic security configurations and troubleshooting

Car Junk (Next.js, React, TypeScript and Tailwind CSS) – [In progress]

- Solving peer-to-peer vehicle trading by building a multi-user marketplace where sellers can list cars and buyers can browse and engage directly.
- Implemented CRUD functionality for vehicle listings, allowing users to add and remove cars within the application.
- Built in-app messaging to enable real-time communication between buyers and sellers, improving trust and negotiation flow.
